

I'm not one to usually write testimonials or complaints, but in the case of Eldar Gezalov, I'm making an exception. Not for any other reason than that the products he offers in his templates, and more importantly the support he offers in his training videos and personal assistance, are truly remarkable.

I was moving from another platform that we had used for years and it was no longer supported. I came across BLOCS and then went looking for templates to assist as I'm far from a website designer. I purchased Eldar Gezalov's templates package after first trying a free sample and then decided to go for the Bloc Masters training. That was a great decision!

With his recommendation, I chose an appropriate template that would best satisfy our needs and within 6 weeks had built two major websites. And I have very little experience in web design. My sites at umasdcatholics.com and stmarysdartmouth.org are examples of what a novice can accomplish with the help and training by Eldar. Trust me, you can save thousands of dollars by doing it yourself!

Eldar was always ready to answer questions. He's amazingly supportive. I can't say I've never received such great support. And his training videos are set up in such a way, that when you come across something new or want to try something different, you only need to watch a short video on that particular topic – and not scan through a long training video to find the answer or solution.

If you are looking for a great website builder software, I would heartily recommend BLOCS, but more importantly, the products and training of Eldar Gezalov. <https://bloccmaster.com> or <https://eldargezalov.com>

I'm happy to recommend him to you and answer any questions you may have about his products and services.
